

**NORDIC**  
WOODFIBRE

# **Nolco-RIB**

**The Nordic way of packaging**

We are a Danish manufacturer, based 50 km south of Copenhagen. Since 1988 we have specialized in the production of lamella packaging which protects against pressure, shock, impact, deformation, surface damage, and high stacking loads.

Our products consist of pressed woodfibre material and are available in widths up to 8 m, zig-zag folded on pallets. Our customers are companies in the cable, steel, aluminium, piping, and rods industries, as well as mechanical and electrical engineering companies.

## Advantages

- Over 30 years of experience in lamella packaging
- Flexible and cut-to-size production
- Sales to more than 50 countries around the world
- Lean and effective processes

# Nolco-RIB

*Load distributing protective cover for shock, impact and weather sensitive goods*

Nolco-RIB is a packaging material made of hardboard strips laminated on both sides forming a lamellar structure. As it is manufactured in running lengths of 156 m, the required length can be individually and flexibly determined in accordance with the dimensions of the packaged goods to be protected. Nolco-RIB is available in widths from 100 to 8,000 mm and therefore suitable as a homogeneous packaging material even for long products. It protects surfaces against shock and impact as well as other physical influences and is also used for the load-distributing wrapping and bundling of different objects.

Only Nolco-RIB offers a width up to 8,000 mm

INFO: The distance between the individual slats is only 6 mm with Nolco-RIB. The shorter distances improve the surface protection. On a pallet with 156 running metres, you therefore get more protection and buy less air.

## Delivery forms:

- Lamella width: 30 mm
- Only 6 mm spacing
- Lamellas are only glued and the glue is heat-resistant
- Widths: 100 up to 8,000 mm
- Standard lengths: 156 m zig-zag folded or 78 m in rolls

## Product Benefits

- Easy to use
- Easy to close with simple tools
- Fast and easy one-man handling
- Protection against impact and shock effects
- Prevents scratches on the packed product due to inside lamination with kraft paper
- Surface protection against climate, oil, water and UV radiation
- Mechanical shock absorber (forklift)
- Low weight: only 2.4 Kg/m<sup>2</sup>
- No nails, staples, splinters required – no risk of damage to the packed goods
- Environment friendly – Main components made of 100 % woodfibre produced from wood residues

## Saves ...

- ... 70 % working time (vs. wood) – you simply wrap it around your product and strap it!
- ... 40 % material vs. wood
- ... Less waste – because of cut-to-size widths
- ... storage – less space required

## Application

- Cover or strapping underlayer
- Coils, rollers, tubes, bars, rods, machine parts, components
